Thanks. I think Region 1 is curious about the formulation results. Since they are part of EPA, I'm comfortable sharing a draft with them – we'd just note the caveats that you mention below. Would that work?

We can get the excel file with container results out this morning, OR, if it needs to be accompanied by the memo, Thuy is working on incorporating Tala's comments. So, nlt mid afternoon for the complete package?

On the formulation results, they've been QC'd but not yet reviewed outside of ACB, as we've been focusing on the container results. We could share the formulation results as a draft today, provided no additional review up the line would be needed to do so. What do you think?

Region 1 is asking to see the lab's results from the testing of the formulation. When do you think we'd be in a position to share those results?
